Jwalant Mahadevwal along with his partner Kanika Agarwal started andblack in 2012 in their chosen city of Ahmedabad. The journey of last 12 years of andblack has been nothing less than a story of growth, strive and experimentation. In this journey of unapologetic attention towards the design process, andblack has managed to complete about 70 odd projects ranging from architectural design of schools, farmhouses, banks and cultural centers, interior design of homes and offices, complex art installations and an exquisite range of accent furniture pieces.

andblack design studio is an interdisciplinary firm that focuses on use of parametric tools and physical modeling as the primary way to evolve design. andblack's philosophy lies in designing the process that leads to the 'solution'. It is their utmost belief that the design process should be robust enough to inform all stages of design, from concept to detailing.

For Jwalant and Kanika, everything that moves them emotionally, inspires them. From complex interactions present in nature to simple everyday concepts of life, for them, inspiration is everywhere. andblack prides itself in conceiving and delivering projects that can be both iconic and meaningful.

Our work presented in this catalogue is an attempt to celebrate the beauty of the idea of a single surface made in a single material. Each item here is as much a work of art as it is a piece of furniture.

There is a compulsive intention to deviate from standard norms of furniture design by redefining how we perceive ergonomics and solve the structural language of each piece.

Our indulgence in organic aesthetics, meticulous use of parametric tools and our understanding of Indian craftsmanship is what defines and informs each outcome.

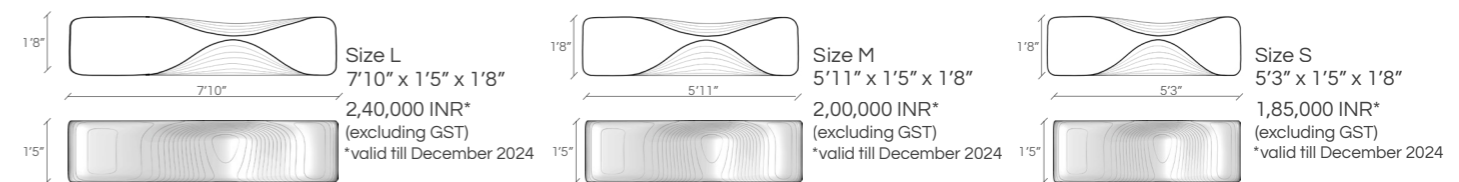

We hope to evoke a lot of emotions in the viewer through our work. The impact that it creates in a viewers mind is the impact that the furniture piece would create in their space.
